# Towards a European database of IPS outcome data

European learning collaborative on IPS

Lars de Winter, October 19th 2023

Towards European database: the goals

1. **Learn from outcomes:** track what goes well and what has room for improvement.

2. **Steer on fidelity:** Explain differences in fidelity score on an item-level: country differences or are we assessing differently?

3. **Qualitative country specific insights:** Explain differences between countries and share challenges and solutions.

4. **European numbers:** Give an impression of the overall results of IPS in Europe.

Our minimal dataset for each country

Program-level

Number of IPS programs
Number of IPS specialists
FTE of IPS specialists

Employment outcomes

Number of clients in regular competitive employment

Number of clients that started and stopped regular competitive employment

Drop-out

Number of clients that stopped IPS: with or without employment

Service-users

Number of clients receiving IPS
Number of clients starting IPS

Coming soon!

Qualitative insights of country-specific challenges and solutions

Fidelity

Average total and item-scores of the *most recently completed fidelity* assessment of all IPS programs in the country (once every 6 months)

Outcomes and disclaimer

Outcome data for Q2 (april-june) 2023 available from 5 countries:

- Norway
- Italy
- France
- Belgium
- The Netherlands

Important notes:

1. Not all data is entirely complete or reliably checked → small differences in current outcomes are possible!

2. The shared data is solely used to give insights and to learn! It is not a competition nor an evaluation of the implementation of IPS in specific countries!

European outcomes (april-june 2023)

|	
211	The number of IPS programs in our 5 countries
10,917	The number of clients receiving IPS in our 5 countries
42,0%	The competitive employment rate in our 5 countries
1,904	The number of clients that started competitive employment in our 5 countries
101.0	The average fidelity score

# Number of clients and IPS specialists per country

Number of IPS specialists

Country	Value
Belgium	21
France	66
Italy	58
Netherlands	300
Norway	342

Number of clients receiving IPS

| Country	Value
Belgium	301
France	805
Italy	947
Netherlands	4045
Norway	4819

Employment rate per country

Number of clients that started and stopped employment per country

Drop-out per country

Fidelity

Fidelity item scores

Top 3 *best* scoring items
1. Diversity of employers (item 20)
2. Diversity of job types (item 19)
3. Time-unlimited follow-along supports (item 23)

Top 3 *worst* scoring items
1. Job development—Frequent employer contact (item 17)
2. Community-based services (item 24)
3. Integration through frequent team contact (item 5)

Top 3 items with *biggest country differences*
1. Assertive engagement and outreach by integrated treatment team (item 25)
2. Community-based services (item 24)
3. Integration through team assignment (item 4)

Total fidelity scores

Bar chart of total fidelity scores: France 99.0, Italy 103.3, Netherlands 110.1, Norway 97.0

Not included? Join us!

We are doing this together!

So special thanks to: Fréderic Deboas (France), Denise Manchisi (Italy), Ellen Wyffels (Belgium) and Jim Steve Jacobsen (Norway) and all other work stream 3 members!
